Career Objective:

Enthusiastic and quick-learning Information Technology student seeking opportunities in embedded and intelligent system development to apply and enhance programming skills in real-world applications. Passionate about AI, IoT, and system-level problem-solving, with a strong foundation in C, Java, and Python

Core Competencies:

- Frontend: HTML, CSS, JavaScript
- Backend: Java, Python (Basic)
- Programming Languages: C, Java, Python, JavaScript
- Database: MySQL
- Tools: VS Code, Git, GitHub, OpenCV, Google Collab
- IT Essentials: Data Structures & Algorithms, OOP, Networking Fundamentals , IoT Fundamentals

Key Strengths:

- Team & individual contributor
- Leadership
- Problem solver
- Time management
- Adaptability

Areas of Interest:

- Embedded Systems & IoT
- AI-Based Application Development
- Full-Stack Web Development
- Data Structures & Algorithms

Co-Curricular Activities:

- Participated in Smart India Hackathon(2024)
- Involved in team-based technical activities and project discussions
- Industrial Visit – Airobosoft Products and Services LLP (Oct 2024)
Visited the organization to understand real-time project development, software lifecycle processes, and industry-level technical practices.

Languages Known:

- Tamil: R ,W, S.
- English: R ,W, S.

Education:

B Tech-Information Technology (2023-2027)

Sona College of Technology, Salem

CGPA: 8.44/10

HSC (2023)

ERK Higher Secondary School, Salem.

Percentage: 89.5%

SSLC (2021)

ERK Higher Secondary School, Salem.

ALL PASS

Internship:

Unified Mentor (Feb 2025) – Web Development Intern

Tools Used: HTML, CSS, JavaScript, Git, VS Code

Worked on developing and enhancing responsive web applications as part of the frontend team. Assisted in implementing features, debugging issues, and optimizing user interface performance. Gained hands-on experience in real-world web development and deployment practices.

Grow Technology (Dec 2025) – Software Development Intern

Tools Used: PHP, XAMPP, MySQL, phpMyAdmin

Contributed to software development tasks in a real-time project environment. Assisted in implementing application functionalities, testing modules, and resolving technical issues. Gained exposure to professional development workflows and collaborative team practices.

Projects:

AI-Based Traffic Management System

Tools: Python, OpenCV, TensorFlow, SUMO, IoT.

Description: Designed a smart traffic control system that analyzes real-time vehicle density and dynamically adjusts signal timings to reduce congestion and improve urban mobility.

Weather Prediction App

Tools: HTML, CSS, JavaScript, OpenWeather API.

Description: Created a web-based weather application that retrieves real-time weather data using the OpenWeather API and displays it through a responsive user interface.

Certifications & Professional Training:

- IoT – NPTEL (Elite)
- Design Thinking – NPTEL (Elite)
- Introduction to Machine learning – Infosys Springboard
- Introduction to Information Technology and AWS Cloud-AWS
